

The Mystery of Consciousness

The great question of the ages might well be If a man die, shall he live again? Today the question gathers to an urgency heightened by intimations that our society may not survive. We need the assurance that life and consciousness transcend the human organism. Writer and editor Don Mansell brings to a fine focus the observations he gathered during his years in Brazil, land heavy with the black arts of spiritism as well as the gamut of soul-searching in Western society. A gripping book as relevant as today's news. This book is a must reading for anyone interested in and concerned about paranormal experiences. The author has drawn on an impressive spectrum of sources in bringing together the paranormal accounts he analyzed. The book is well worth what it costs. Jack W. Provonsha, M.D., Ph.D.
