

Choices in the Afterlife: What We Can Do and Where We Can Go After Death

The good news about the afterlife is we are not different people after we die. The bad news about the afterlife is we are not different people after we die. We begin the afterlife with the same sense of humor, coping skills, memories, attitudes, intelligence, reverence and spiritual beliefs that we had in life. Choices In The Afterlife frames our future reality with four overlapping activities, self realization, assimilation, healing and progression. To even have choices in our afterlife we must realize we are still our self and in our present although we are out of the physical body we identified so strongly with in life. Assimilation means reviewing our prior life and translating that experience into knowledge. Healing takes place in several ways in order to empower and energize us. Progression is the process of improving our reality by striving toward better situations and more mental and spiritual possibilities in the afterlife. This book will help you understand how you continue your life in the world of spirit. By decreasing or eliminating the fear of the natural transition we call death we are more free to focus on the present and make the choices that will set the stage for the rest of our life both in physical and in our afterlife.
