

## Growing A Healthy Church

Sheep swapping, shuffling of the saints- Whatever you call it, many churches are growing only because Christians transfer from one church to another. Whats more, many churches arent growing at all. The problem, according to authors, Dann Spader and Gary Mayes, is that too many church calendars are filled with outdated, mediocre programs that have become more of a burden than a blessing. That, coupled with the fact that these programs minister almost exclusively to Christians, leaves little for the non-Christian seeker to get excited about. Growing a Healthy Church is not a list of trendy new programs for your church agenda. It is a journey of rediscovery. Spader and Mayes look closely at the four stages of spiritual growth in relation to outreach. Using the innovative M-level system, these gifted men show how a church can minister to all individuals regardless of their levels of maturity in potential service. This helps eliminate the mistakes of forcing new Christians into service that may overwhelm them or may leave the mature Christian unchallenged. Proven successful through SonLife and churches who have used this system, this resource will help you focus on the simplicity of Christs ministry, enabling you to build an effective discipling strategy for your church.
