

## Healing Hashimotos: A Savvy Patients Guide

The most common type of thyroid disease is hypothyroidism and in the modern world, the most common cause of hypothyroidism is Hashimotos Thyroiditis. Medical treatment guidelines focus only on thyroid hormone replacement. Mind you this is with precious little finesse in dosing and very few medication options. Hashimotos Thyroiditis is a complex interaction of genes, environmental toxins, nutrients, the immune function and other hormones. Consequently, many patients need correction in a unique combination of these areas to really feel their best. The purpose of this book is to serve the savvy, educated patient who is questing to regain their optimal health. For those of you who have done the basic steps and still are not at your best, this is for you.
