

## The potato, (The rural science series)

This book is intended to give brief and practical suggestions on the growing, breeding and marketing of potatoes. It is written especially for the practical farmer and the student who may wish concise information on the potato without having to read many miscellaneous sources of information, especially experiment station bulletins which, although highly valuable, are likely to contain much detail. The chapters on breeding and varieties occupy an unusually large proportion of the book. This is for the reason that these subjects have been treated in potato literature much less than methods of culture, and the general interest in them has called for this extended discussion to meet not only the necessities of the case but also the public demand. I have been glad to place in the hands of Doctor Barrus and Mr. Dean the chapters on Diseases and Field Methods respectively. These men have had broad experience in their lines and are thoroughly competent to discuss them. The author wishes, also, to acknowledge the valuable aid of Professor Herrick in reading the manuscript on Potato I nsects, and Mr. A. C. Fraser and Mr. J. J. Pollock for valuable assistance. AKTHUR W. GILBERT. I thaca, New York, January,(Typographical errors above are due to OCR software and dont occur in the book.)About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology.Forgotten Books Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text.
